

Lifeline Products

HOLD-ME Lifeline Anchor HMA58

Designed to terminate lifelines without tying knots. The practical solution for complying with national safety standards and reducing liability exposure.

“Knots shall not be used for load bearing end terminations.”
- ANSI Z359.1 section 3.2.7.2.2

“Knots can reduce the strength of lifelines up to 50% depending on what type of knot is employed.”
- National Cordage Institute

Use with 5/8 to 3/4” lifelines.
5000 lb ultimate load capacity
Complies with ANSI Z359.1
