

Roller Bumper, Soft Clamp-on

Description

versatile! The flexible design lets you clamp this bumper onto any modular platform and fixed length platforms with a minimum rail height of 6". The distance from the platform to the building surface is 8". An extendible version out to 18" is also available.

Easy! The simple clamp-on design installs easily and securely without any tools.

Durable! Strong steel construction that stands up to abuse. Note the totally enclosed threads to prevent dirt build-up.
